relatively few publications have comprehensively considered all groups of bark beetle natural enemies (Bałazy, 1968; Stark and Dahlsten, 1970; Mills, 1983; Stephen et al. , 1993; Fuxa et al. , 1998; Gokturk et al. , 2010).

Feral hogs (also called wild hog; *Sus scrofa*) are preyed on by several natural (that is, nonhuman) species of carnivores and omnivores in the United States.

However, man is still unquestionably the primary and most significant predator of non-native feral hogs. For the most part, predation by natural species is thought to
