## **Bag of words - Natural Language Processing in Action Video ...**

Your device hears you speak, understands your intent and executes an action, all in about four seconds. You know it worked because it tells you so — in a properly formulated and perfectly spoken human sentence. Natural language processing deals with how computers comprehend, interpret and work with human language. The technology isn't new, but it's growing fast because of rapid advancements in computing and easier access to big data.
