The Division of Neonatology has played an important role in performing clinical trials in neonates by participating as one of the 16 sites for the NICHD Neonatal Research Network, which has been internationally recognized for findings that have led to significant advances in the clinical care of newborn infants.

Clinical Investigations | Neonatology Research

Neonatology is a branch of medical science which deals with care, improvement, and infections of newborn children. In some cases babies are born before their bodies are prepared to leave the womb. Major organs like heart, lungs, stomach, and skin may not be developing enough to work without exceptional help.
