Say you have an envelope modulating the cutoff of a filter, and the same envelope is modulating
something somewhere else. If you want to control the depth of the modulation of one and not the
other using a macro or other modulator, you would use the sidechain function.

The PDF Guide to NI Massive. : edmproduction

At the heart of MASSIVE X you'll find the completely new oscillator section – capable of producing
more variation than some entire synths, right at the source. Choose from over 170 wavetables and
10 different modes of reading them – from the aggressive Gorilla family, to a wavetable-bending
mode, Hardsync, Formant, and many more – each ...
