North Seattle Pediatrics - Your Family Matters

The low safe dose range of this medication for the child who weighs 20kg is 200mg. To calculate the high safe dose for this child, use the following:= Cross multiply the fractions: $30\text{mg} \times 20\text{kg} \times X\text{mg}$. Solve for X by dividing each side of the equation by 1 (canceling the units that are in both the numerator and the denominator): $30\text{mg} \times 20\text{kg} = 600 \times 1 = 1X600 = X$.
