The second section is entitled Peripheral Nerve Blocks and provides descriptions of over 20 different blocks. Several blocks for both upper and lower limbs are covered as well as intercostal block, inguinal field block and orbital blocks (retrobulbar, peribulbar and sub-tenon techniques are all described).

but can be devastating  
for both the patient  
and the  
anaesthesiologist. This  
review will concentrate  
on current knowledge

injury secondary to  
nerve blocks,  
complications from  
continuous peripheral  
nerve catheter  
techniques, and local
