Polymer foams handbook : engineering and biomechanics ...  
Polymer Foams are used in many different types of applications and it is hard to find an area where they are not utilised. Polyolefin Foams are a relatively recent development compared to the other types of foam. The Polyolefin foam processes were developed in the 1960s and 1970s. This Review starts with a brief history of the subject and then reports on the current situation regarding ...

Polymer Foams Handbook: Engineering and Biomechanics ...  
Abstract. This chapter covers two major classes of polymer foams, the conventional foams formed by foaming agents and syntactic foams. The first part presents the basics of polymer foaming through the use of blowing agents including a brief introduction on blowing agents and the common foaming methods used by both laboratories and industries.
