ranging from 18 to 50%. Risk factors for death from sepsis include underlying illness, increased age, and multi-system organ failure. This is compounded by the significant variation in the management of early severe sepsis.

## **Sepsis - Springer**

Early treatment is advocated to reduce mortality in sepsis [1,2,3,4].The emergency department (ED) has a critical role in the identification and treatment of sepsis as the majority of patients in hospital with sepsis are admitted as emergencies [5, 6].It is important to ensure that those treatments are delivered in a timely and optimal manner to improve outcome whilst minimising harm.

## **Treatment variables associated with outcome in emergency ...**

Sepsis is one of the most common causes of death among hospitalized patients in the intensive care unit (ICU). It is particularly difficult to diagnose in this setting because of the multiple comorbidities and underlying diseases that these patients present [1, 2].The definitions of sepsis and septic shock focusing on the host's inflammatory response have remained unchanged since the first ...

## **Sepsis: A Review of Advances in Management | SpringerLink**

Sepsis is one of the leading causes of death worldwide and is a major public health issue [1,2,3,4,5].The Intensive Care Over Nations (ICON) Audit [] showed that sepsis accounts for 30% of reasons for intensive care unit (ICU) admission and is associated with a hospital mortality rate of 35%.A recent review of 27 epidemiologic studies, mostly based on North American, Australian and North ...

The Society of Critical Care Medicine and the European Society of Intensive Care Medicine recently released a consensus statement redefining the clinical syndrome of sepsis. The new diagnostic criteria eliminate the concept of the Systemic Inflammatory Response Syndrome (SIRS) and rely on known or suspected infection with a change in Sequential Organ Failure Assessment (SOFA) score  $\geq 2$ , or a ...

## **New Sepsis Criteria - CHEST**

Sepsis is the most common cause of death nowadays. A recent survey showed more than 48 million cases in 2017 worldwide, six million of which died [].The recent sepsis definition of sepsis as a life-threatening organ dysfunction associated with a dysregulated host response to an infection [] allows for the severe infection by the novel SARS-CoV-2 (COVID-19) to be considered a case of sepsis ...
