### Sidereus Nuncius Sidereal Messenger 1st

Publication date: March 13, 1610. Sidereus Nuncius (usually Sidereal Messenger, also Starry Messenger or Sidereal Message) is a short astronomical treatise (or pamphlet) published in New Latin by Galileo Galilei on March 13, 1610. It was the first published scientific work based on observations made through a telescope, and it contains the results of Galileo's early observations of the imperfect and mountainous Moon, the hundreds of stars that were unable to be seen in either the Milky Way ...

### Sidereus Nuncius, or, The Sidereal Messenger / Edition 1 ...

While the title Sidereus Nuncius is usually translated into English as Sidereal Messenger, many of Galileo's early drafts of the book and later related writings indicate that the intended purpose of the book was "simply to report the news about recent developments in astronomy, not to pass himself off solemnly as an ambassador from heaven." [2] Therefore, the correct English translation of the title is Sidereal Message (or often, Starry Message). --Wikiped. Nov/2014

### The Sidereal Messenger of Galileo Galilei: Galilei ...

When, in March 1610, he published his discovery of the lunar surface and the moons of Jupiter in a Latin treatise entitled Sidereus Nuncius, or "The Starry Messenger," he went so far as to dedicate the work to Cosimo, and even named the newly discovered moons the "Medicean Stars," after the Medici family. Galileo was soon rewarded for his efforts at wooing the powerful family: in June of 1610, he gained appointment as "First Mathematician of the University of Pisa, and First Mathematician ...
