For my tradeblog assignment, I read Snoop: What Your Stuff Says about You by Sam Gosling. Sam Gosling has a PhD in social psychology, went to school at Berkeley, teaches at the University of Texas, and researches this subject.

*Book review: Sam Gosling's *Snoop: What Your Stuff Says ...*

...ibility to openness and originality—the things we own and the way we arrange them can say more about who we are than even our most intimate conversations. Packed with original research and a wealth of fascinating stories, Snoop is a captivating guide to our not-so-secret selves, and reveals how intensely connected we are to the places in which we live and work.

'What Your Stuff Says About You' : NPR

Sam Gosling, author of Snoop: What Your Stuff Says About You, can use the information in that first sentence to deduce all sorts of things about my personality. More importantly, his book tells the rest of us how to interpret the signals that others send out with their stuff.

What Your Stuff Reveals About You | Psychology Today

Snoop: What Your Stuff Says About You by Sam Gosling is an excellent book on what the things we own and how they're arranged say about us as people. Majorly relying on the Five Factor Model of personality, Snoop gives fascinating, data-driven analyses of the assumptions that we make -- and the ones we should be making -- about people based on the stuff in their room, office, or even on their bodies.

Snoop: What Your Stuff Says About You by Sam Gosling

To write a book about snooping and not once mention the entire field of ethnographic research is just wrong. This book seems to be more suited for a pamphlet about this one lab's research rather than an actual investigation into what your stuff says about you. I was so, so disappointed in this book.

Snoop: What Your Stuff Says About You - free PDF, CHM, DOC ...

have just met. There's a good chance that your description will feature traits heavily—terms such as curious, friendly, extraverted, anxious, and moody arise easily in the language of personality. One study found that the most common words people used to describe themselves or others were friendly, lazy, helpful, easygoing, honest, happy, moody, self-

Social Psych Student: Snoop: What your stuff says about you

If you want to know what your stuff really says about you, read Snoop." – Jonathan Haidt, author of The Happiness Hypothesis "Sam Gosling is an engaging writer, a brilliant psychologist, and a charming individual—and he must never, ever be allowed inside my office!"
