SQL is an essential skill for data scientists, and Microsoft SQL Server is one of the world's most popular database systems. In this course, you'll start with simple SELECT statements, and refine these queries with ORDER BY and WHERE clauses. You'll learn how to group and aggregate your results, and also how to work with strings.

Introduction to SQL Server | DataCamp

Exercise. We will be using a database with data about some of Pixar's classic movies for most of our exercises. This first exercise will only involve the Movies table, and the default query below currently shows all the properties of each movie. To continue onto the next lesson, alter the query to find the exact information we need for each task.
