Over the last 65 years the global literacy rate increased by 4% every 5 years - from 42% in 1960 to 86% in 2015. 1. Despite large improvements in the expansion of basic education, and the continuous reduction of education inequalities, there are substantial challenges ahead.

### **Literacy - Our World in Data**

Statistical literacy is the ability to understand and reason with statistics and data. The abilities to understand and reason with data, or arguments that use data, are necessary for citizens to understand material presented in publications such as newspapers, television, and the Internet. However, scientists also need to develop statistical literacy so that they can both produce rigorous and reproducible research and consume it.
