Anatomy & Physiology | Homework Help | CliffsNotes

Anatomy is one of the most difficult subjects you will have to learn during your studies. It consists of two main divisions: macroscopic (or "gross" anatomy) and microscopic anatomy. The former deals with large structures that are mostly seen with the naked eye, while the latter involves the study of tissues and their organization into organs and systems on a microscopic level.

Anatomy and Physiology Study Guide Flashcards | Quizlet

As one of the basic life sciences, anatomy is closely related to medicine and to other branches of biology. This site is meant to compliment a high school level anatomy class. It contains worksheets, images, study guides and practice quizzes to support a rich curriculum in anatomy and physiology.

Page 1 Anatomy and Physiology Study Guide for the HESI ® exam

Study Guide For Anatomy Of

CliffsNotes study guides are written by real teachers and professors, so no matter what you're studying, CliffsNotes can ease your homework headaches and help you score high on exams.

Free Anatomy Flashcards

The study of the different parts of the body, what they do, and where they're located, constitutes anatomy. Think of it as a kind of geography of the human body. Physiology is the study of how all the different organs, muscles, bones, and every other part of the human anatomy work together to sustain life and health.
