Suicide Prevention In Custody Self

Since 1983, landmark studies from NCIA's Suicide Prevention in Custody Services have found that the suicide rate in county jails is several times greater than that of the general population, while the suicide rate in prisons remains slightly higher than in the community. It is essential that correctional agencies implement a sound suicide prevention policy, including the critical component of staff training, to help alleviate the risk of inmate suicide and costly litigation.

July 2019 Preventing Suicide and Self-Harm in Jail

In response to a rising tide of self-inflicted deaths and serious self-harm, in 2017 the IAP focussed on the prevention of suicide in prison custody. Working in partnership with Inside Time, the prisoners' and detainees' newspaper, National Prison Radio and the Samaritans, we developed 'Keeping Safe', a substantive programme of work with prisoner consultation at its heart.

Keeping Safe — Independent Advisory Panel on Deaths in Custody

For every completed in-custody suicide, there are many more attempts. Almost all of these deaths are preventable if correctional officers understand the risk factors for suicide, assess all detainees for suicidal ideation, and take any appropriate measures to protect a suicidal inmate from self harm.
