Tutorialspoint

The text covers, in a single volume, both switching systems and telecommunications networks. The book begins with a brief discussion on the evolution of telecommunication. It then goes on to give a classification scheme for switching systems, and describes the basic components of a switching system and the fundamental concepts of network structures.

Switching Systems This network
connection cannot be simply made with
telephone sets and bunch of wires, but a
good system is required to make or
break a connection. This system is
known as the Switching System or the
Switching Office or the Exchange.

of systems that establishes a distant call. The switching systems are part of a telecommunication network. The switching stations provide connection between different subscribers. Such switching systems can be grouped to form a telecommunication network. The switching systems are connected using lines called the Trunks.
