The Carpathians are a distinct mountain chain in the core of Central and Eastern Europe holding valuable biological resources and a rich cultural heritage. The last twenty years have witnessed an increasing awareness of the Carpathians' value for European society and strengthened research cooperation in the region, especially after the enlargement of the European Union in 2004 and 2007.

Nature Edit. Carpathians can manipulate nature, such as drawing cloud cover if they need to be outside during the daytime or creating lightning when they incinerate a vampire's heart and body. Shape-shifting Edit. Carpathians can take any shape they wish, but they prefer owls for flight and wolves for running. Telekinesis Edit

Carpathians (/ ˌ k ɑː r ˈ p eɪ θ i ə n z /) are a range of mountains forming an arc throughout Central and Eastern Europe. Roughly 1,500 km (932 mi) long, it is the third-longest European mountain range after the Urals at 2,500 km (1,553 mi) and the Scandinavian Mountains at 1,700 km (1,056 mi). The range stretches from the far eastern Czech Republic (3%) in the ...

Carpathian Mountains - Wikipedia

Current regional policies and land management practices have enormous significance for the maintenance of various values of the Carpathian region, e.g., cultural landscapes, agricultural or forest biodiversity. There is a need to integrate planning across sectors and spatial scales, linking local and regional policies.

The Carpathians are a "subsystem" of a bigger Alps-Himalaya System that stretches from the western Europe all the way to southern Asia, and are further divided into " provinces " and "subprovinces". The last level of the division, i.e. the actual mountain ranges and basins, is usually classified as "units".
