The Case of Little Albert (Psychology Classics Book 1 ...

Written by Alexander Burgemeester · 1 Comment. Little Albert was the fictitious name given to an unknown child who was subjected to an experiment in classical conditioning by John Watson and Rosalie Rayner at John Hopkins University in the USA, in 1919. By today's standards in psychology, the experiment would not be allowed because of ethical violations, namely the lack of informed consent from the subject or his parents and the prime principle of "do no harm".
