Book One, placing the main character, Quantum, in a vice-ridden fleshpot of a world called The Loop. The language in the book is especially important to me. My editor, George C. Hopkins, and I have spent long hours peppering the book with forgotten sayings, 1930s slang, hard-boiled detective verbiage and ultra obscure film references. Look for them

Typically, we divide feedback loops into two main types: positive feedback loops, in which a change in a given direction causes additional change in the same direction. For example, an increase in the concentration of a substance causes feedback that produces continued increases in concentration. negative feedback loops, in which a change in a
