The Green Skyscraper:
The Basis For
Designing Sustainable
Intensive Buildings.
Although many
designers have
succeeded in applying
ecological or "green"
design principles to
architecture on the
small scale, city
centers remain an
uncharted frontier
when it comes to
achieving integrated,
ecologically responsive
buildings.

For a hundred years the skyscraper has been the strongest of brands. Doubters have had little or no impact on architects, most of whom seem to have assumed that God put them here to erect the tallest skyscraper, the most intelligent skyscraper, or, In the case of Ken Yeang, the greenest skyscraper.

Malaysian-born, UK-based architect Ken Yeang, has designed Fusionopolis. It is an eco-friendly structure to be built in

Singapore. This 1.4 kilometer high building is designed essentially as a normal home. The building of this skyscraper is for Ken's intention in promoting
