Online Library The New

Environmental Governance

environmental governance, an enterprise that involves collaboration between a diversity of private, public, and non-government stakeholders who, acting together towards commonly agreed goals, hope to achieve far more collectively, than individually. Such an approach appears to blur the familiar sharp boundaries that

processes of global environmental protection. The efficacy of global environmental governance will ultimately depend on implementation at global and domestic levels.

Global Environmental Governance - Wikipedia

Environmental governance is a

Online Library The New

Environmental Governance

concept in political ecology and environmental policy that advocates sustainability (sustainable development) as the supreme consideration for managing all human activities—political, social and economic. Governance includes government, business and civil society, and emphasizes whole system management.

Online Library The New

To capture this diverse range of elements, environmental governance often employs alternative systems of governance, for example watershed-based management.

Environmental governance - Wikipedia

Collaborative environmental governance practice tends to make

Online Library The New

assumptions about how Indigenous knowledge systems can be incorporated into decision-making without reflecting satisfactorily on contrasting perspectives of Indigenous peoples themselves; these perspectives are partially captured in the Indigenous governance literature.
