Plantar Fasciitis - The ProLab Advantage

The tenderness is usually toward the heel, but the entire sole of the foot can be affected. A sign of abnormal tension or tightness that can lead to plantar fasciitis is a bony prominence (heel spur) that develops where the inflamed plantar fascia attaches to the heel bone (calcaneus). Plantar fasciitis can make walking and running difficult. It can make the foot feel particularly stiff and sensitive in the morning or when rising after sitting or getting out of a car.
