The Trane XE90 is a single-stage gas furnace that was marketed as a high-efficiency heating unit. Each model of the XE90 range boasts a 90+ AFUE (annual fuel utilization efficiency) percentage. This is the percentage of heat energy used to heat the conditioned space, with the remaining energy being lost with exhaust material.

[How to Fix a Trane Furnace: Furnace Troubleshooting](#)
Trane 95 and 90 gas furnaces deliver at least 90% efficiency, far exceeding the government minimum standard of 80 AFUE for new furnaces. If you have a furnace that is at least 10 years old, it probably has an AFUE somewhere between 60 and 70 - meaning up to 40 cents of every dollar you pay for fuel is wasted.
