UnicodeDecodeError: 'utf-8' codec can't decode byte 0x80 in position 0: invalid start byte #62 Open yunfei-stli opened this issue Jan 5, 2019 - 2 comments

python - UnicodeDecodeError: 'utf8' codec can't decode ...  
@Pilot -- Not really. The real problem is buried somewhere in \_\_getdata.I don't know why you're getting a non-decodable character. You can try to come up with patches on the dict to make it work, but those are mostly just asking for more problems later.

UnicodeDecodeError when reading CSV file in Pandas with ...  
UnicodeDecodeError: 'utf-8' codec can't decode byte 0xf3 in position 356: invalid continuation byte. pip version: pip 10.0.1 from c:\program files\python36\lib\site-packages\pip (python 3.6) Installing and UNINSTALLING a local package. pip uninstall vrt-> UnicodeDecodeError: 'utf-8' codec can't decode byte 0xf3 in position 356: invalid ...

UnicodeDecodeError: 'utf8' codec can't decode byte 0x80 in ...  
These links may help, but I have no experience with international codesets -- perhaps you need to encode your path strings before parsing them, or do something with locale - or somehow change your codec to Latin-1? UnicodeDecodeError: 'ascii' codec can't decode byte 0xe9 in position 6: ordinal not in range(128)

python - UnicodeDecodeError: 'utf8' codec can't decode ...  
UnicodeDecodeError: 'utf-8' codec can't decode byte 0xa3 in position 127: invalid start byte how to solve this OmgimAlexis mentioned this issue May 25, 2018

[Solution] Pyinstaller UnicodeDecodeError: 'utf-8' codec ...  
word\_vectors = KeyedVectors.load\_word2vec\_format(path, binary=True) into. word\_vectors = KeyedVectors.load(path) It turns out that load\_word2vec\_format is used when we're trying to load word vectors that are trained using the original implementation of word2vec (in C).

UnicodeDecodeError: 'utf8' codec can't decode bytes in position 32243-32245: invalid data. Now these errors would then subsequently be particularly hard to track down, and essentially you want to have the Umlaut in your references section.

[Bug] UnicodeDecodeError: 'utf-8' codec can't decode byte ...  
UnicodeDecodeError: 'utf8' codec can't decode byte 0x9c. I have a socket server that is supposed to receive UTF-8 valid characters from clients. The problem is some clients (mainly hackers) are sending all the wrong kind of data over it. I can easily distinguish the genuine client, but I am logging to files all the data sent so I can analyze it...

UnicodeDecodeError Utf8 Codec Cant Decode  
UnicodeDecodeError: 'utf8' codec can't decode byte 0xa5 in position 0: invalid start byte. \_\_getdata() function returns dictionary {} . Before posting this question I have referred this of question os 50.
