Diplomates must successfully complete one year of fellowship training (after residency) in a vascular and interventional program accredited by the ACGME or the RCPS (Canada). They must also complete one year of practice or additional approved training, with at least one-third of that year spent in vascular and interventional radiology.

ABR

Vascular interventional radiology (VIR) laboratories perform a myriad of procedures. Although antibiotic prophylaxis is not beneficial in all procedures performed in the VIR laboratory, in cases where antibiotic prophylaxis is recommended, evidence-based processes should be implemented to ensure guidelines established by the Society of Interventional Radiology are followed.
