Finally, the book summarizes recent research on the following issues: * moral judgment scores within and between professions, * pre- and post-test evaluations of ethics education programs, * moral judgment and moral behavior, * models of professional ethics education, and * models for developing new assessment tools.

Moral development focuses on the emergence, change, and understanding of morality from infancy through adulthood. Morality develops across a lifetime and is influenced by an individual's experiences and their behavior when faced with moral issues through different periods' physical and cognitive development.

Every year in this country, some 10,000 college and university courses are taught in applied ethics.
And many professional organizations now have their own codes of ethics. Yet social science has had little impact upon applied ethics. This book promises to change that trend by illustrating how ...

*Moral Development in the Professions* by James R. Rest & Darcia Narváez (eds.)

Piaget described a two-stage process of moral development while Kohlberg's theory of moral development outlined six stages within three different levels. Kohlberg extended Piaget's theory, proposing that moral development is a continual process that occurs throughout the lifespan.

Moral development

The third level is the post-conventional level of moral development, which also has two stages. This level of moral development considers humanity and universal ideas of right and wrong above all ...

*Moral Development in the Professions* by James R. Rest, Darcia Narváez (eds.)
Each chapter begins with the research base of the cognitive-developmental approach and summarizes recent research on issues such as moral judgement scores within and between professions, moral judgement and moral behavior, models of professional ethics education, and models for developing new assessment tools.

Moral development in childhood can be regarded as one of the central aspects of socialization. School education plays an important role in acquisition of moral norms. Development of children's moral competence was in the focus of our attention. More than 650 children aged from 7 to 8 took part in the research.
